# The Qube! UI Release Notes  
#  
#####
```

The Qube! UI:

Provides interactive updates on jobs and workers via push notifications from the Qube! Supervisor Proxy. A highly configurable interface allows users to tune it to their individual workflows. The UI introduces a new playback system with wide image format support and color management.

```

What's new:

The Qube! UI replaces ArtistView and is now available on all Qube! supported platforms.
