

# Search Paths

Having the Qube! commands available in the path from the command-line can be useful. Here is what is needed to set this up:

- **Linux** (~/.cshrc/ or ~/.tcshrc):

```
a. setenv QBDIR /usr/local/pfx/qube  
b. set path = ($path $QBDIR/bin $QBDIR/sbin)
```

- **Linux** (~/.bashrc):

```
a. export QBDIR=/usr/local/pfx/qube  
b. export PATH=$PATH:$QBDIR/bin:$QBDIR/sbin
```

- **macOS** (~/.bashrc):

```
a. export QBDIR=/Applications/pfx/qube  
b. export PATH=$PATH:$QBDIR/bin:$QBDIR/sbin
```

- **Windows:** The .msi automatically adds the C:\Program Files\qube\bin to the PATH.
