supervisor_highest_user_priority

Synopsis

`Supervisor_highest_user_priority` = *priority*

Priority is an integer specifying the highest numerical priority value (smallest number) that an ordinary (i.e. non-admin) user may use to submit or modify a job. Admins may not want to allow users to assign themselves the highest possible priority, reserving that privilege for render wranglers or other special users.

Example

`supervisor_highest_user_priority = 10`

Defaults

1
