

# supervisor\_logpath

## Synopsis

`supervisor_logpath = path`

*Path* is used to specify the log directory to use to store job log data as well as individual host and user histories. This is further explained in this documentation under [Job Logs](#)

## Example

```
supervisor_logpath = /var/spool
```

## Defaults

- Linux & OS X: `/var/spool/qube`
- Windows XP / Windows Server 2003: `C:\Program Files\pfx\qube\logs`
- Windows 2008 / Vista / Windows7 / Windows 8: `C:\ProgramData\pfx\qube\logs`
