

General Widget Hierarchy

App

1.
 - a. └ main frame
 - b. └ toolbar
 - c. └ menu
 - d. └ statusbar
 - e. └ notebook (with tabs for the different layouts)
 - i. └ JobLayout
 1. └ JobList panel
 - a. └ data panels (tabbed)
 - i. └ stdout, stderr, properties, etc
 - b. ...
 - ii. └ HostLayout
 1. └ HostList panel
 2. └ data "properties" panel

Preferences are stored under the qbPrefs.preferences Python dict (associative array)
Submit dialogs add their own unique components to the standard set supplied by submit.py. Job Parameters
should be specified in both GetValues() and SetValues().
