

# KB Configuration

- Cross-Platform Rendering
- How to turn off preemption
- What if I want to lock down certain hosts to only run certain jobs?
- What if I want to submit jobs to only run on a certain set of hosts?
- Where is the qb.conf file?
- What does a job's 'instance count' and the 'host.processors=X' reservation mean with respect to machine cores?
- Where is PostgreSQL software installed, and where are its data directory, configuration file, and log file?
