worker_logfile

Synopsis

`worker_logfile` = *filepath*

Filepath is the physical location of the Worker's log file. The Worker writes the events/actions it takes during its execution in this file.

Example

`worker_logfile = /usr/tmp/workerlog`

Defaults

- Linux & OS X: `/var/log/workerlog`
- Windows XP/2003:   `C:\Program Files\pfx\qube\logs\workerlog`
- Windows Vista/2008/7: `C:\ProgramData\pfx\qube\logs\workerlog`
