

# qbconfigfile

[ [Description](#) ] [ [Usage](#) ] [ [Options](#) ] [ [Notes](#) ] [ [Examples](#) ] [ [See also](#) ]

## Description

**qbconfigfile** can be used as a syntax checker for the various Qube configuration files. Very useful for evaluating inheritance in the qbwrk.conf file, refer to [Centralized Worker Configuration](#) for more details

## Usage

qbconfigfile <file>

## Options

Option	Description
-help	Command help
--version	Command version

## Notes

## Examples

qbconfigfile /etc/qbwrk.conf
