

# SimpleCMD\_ParametersClarisseLoadOnce

Parameters Specific to Clarisse

▼ [Click here for details...](#)

## Clarisse Paths

### Executable

Explicit path to the Clarisse CNode executable.

### Render File

Browse or enter manually the location of the scene file to be rendered. This is a required field for submission.

Important: Best practice is to ensure the scene file and all of its dependent files such as textures are on network storage accessible by the workers.

### Output File Path

Specify the Directory for output.

### Image Prefix

Specify the padding on frame number with #.

### Image/Layer

Clarisse Image or layer to be rendered.

### Format

Specify the image format from the dropdown.

## Clarisse Options

### Threads

Specify the number of threads used by CNODE.  
Set 0 to use all available threads.
