

# supervisor\_logfile

## Synopsis

`supervisor_logfile = path`

*Path* is used to specify the single log file for the supervisor's internal operations. This is not the same as [supervisor\\_logpath](#) which determines the location of the job logs.

## Example

```
supervisor_logfile = /var/log/supelog
```

## Defaults

- Linux & OS X: `/var/log/supelog`
- Windows XP / Windows Server 2003: `C:\Program Files\pfx\qube\logs\supelog`
- Windows 2008 / Vista / Windows7 / Windows 8: `C:\ProgramData\pfx\qube\logs\supelog`
