

# Getting GUI to work under Ubuntu

Add to `/etc/apt/source.list` (this is for Gutsy Gibbon)

```
deb http://apt.wxwidgets.org/wxpython gutsy-wx main
```

Run the following to add wxwidgets pgp key:

```
$ wget -q http://apt.wxwidgets.org/key.asc -O- | sudo apt-key add -  
(returns)  
OK
```

Update apt-get repo:

```
$ sudo apt-get update
```

Install python 2.4:

```
$ sudo apt-get install python2.4
```

And change python link:

```
$ cd /usr/bin ; sudo rm python ; sudo ln -s python2.4 python
```

Change default-version in this file to 2.4:

```
$ sudo vi /usr/share/python/debian_defaults
```

Install wxWidgets 2.8:

```
$ sudo apt-get install python-wxgtk2.8
```
